### Introduction:

Welcome to the Juvie Talk and Solitary Confinement Group! Over the next few days our team will utilize the [juvietalk.com](http://juvietalk.com) play builder created by Richard Ross and his team to recreate the experiences of juveniles that have experienced solitary confinement. The Zoukis Research Collaborative is interested in this issue, and over the past several summers has spent a significant time performing collaborative survey research on attitude formation on issues in criminal justice. This year, we have decided to create a set of videos that encompasses this research mission and the student experience in the Summer Institute. Your job as a team is to create these videos by recording excerpts of Juvie Talk and interviewing your fellow students, graduate team leaders, and speakers. We will also be scripting, editing, and then presenting this video for the members of the Zoukis community (including yourself!) at the end of the course.
